

Company announcement

Release date 23 April 2026

March 2026 Quarterly Activities Report and Appendix 4C

Financial

The Company's cash position on 31 March was \$4.3 million, down \$892,000 during the quarter.

The cashflow deficit from operating activities in the March quarter was \$776,000, better than the deficit of \$953,000 recorded in the March Quarter 2025. While sales receipts were lower, net operating outlays fell by a larger amount.

Net operating outlays of \$1,242,000 included payments of \$282,000 for legal fees, offset by \$274,000 in reimbursements from AXA Insurance.

Quarterly cash flow data (\$000)

Note that quarterly figures are volatile and caution should be taken in extrapolating such data.

In accordance with Listing Rule 4.7C, payments made to related parties and their associates included in item 6.1 of the Appendix 4C relate to directors' fees (including superannuation) paid to non-executive directors.

Operations

It was pleasing to see progress being made on several fronts. Sales were solid, the factory is now operating well after a slow start, R&D efforts are encouraging, and strategic alliances are being formed across the globe to expand our footprint into new regions and new markets.

Sales volumes were 385 tonnes, similar to the 381 tonnes sold in the same period last year. Brazil accounted for 60%, Europe 24%, Australia 13% and the USA 3%.

Production totaled 356 tonnes. The factory resumed operations on 5 January after being closed for some years and not unexpectedly, several equipment failures occurred early in the Quarter. The plant operated for 37 days out of the 62 weekdays available, with the balance affected by statutory holidays (15 days) and repairs. The issues lessened over time and during the last three weeks of March the factory operated every weekday and at close to current capacity of 14.7 tonnes (14 pallets) per day.

Product inventory on 31 March was 1,151 tonnes including China 466 tonnes.

R&D efforts in China are continuing. A product with a 10% lanthanum content has been developed with good P-binding and free La properties. Preparation for a patent application is underway and a plan to produce bulk samples for third party laboratory tests and in-lake trials is being formulated.

Corporate

Phoslock continues to address legacy legal matters, including a potential class action filed by the Banton Group on behalf of certain shareholders. The action is still at the discovery phase. Mediation is currently scheduled to commence on 11 June. While we cannot predict the outcome of these matters, we are fully committed to complying with all regulatory requirements and defending the company's interests.

This announcement has been approved by the Chairman.
